

SC Pack announces the acquisition of Frapak Packaging

Brie-Comte-Robert, France, September 12th, 2025

The SC Pack Group, a leading player in the production and distribution of innovative and eco-responsible packaging solutions, announces the acquisition of Frapak Packaging, a trusted partner of the group for more than 15 years. Frapak Packaging is one of Europe's leading suppliers of plastic packaging for the cosmetics, household, pharma, and food sectors.

This strategic transaction, carried out with the support of MML Capital Partners, marks a new milestone in the international development of SC Pack.

Founded over 45 years ago and headquartered in the Netherlands, Frapak Packaging has established itself as a key player in the European primary packaging industry in both plastic and glass, thanks to its unique expertise and proven ability to deliver both standard and customized solutions.

With this acquisition, the SC Pack Group will:

- strengthen its presence across Europe;
- expand its product portfolio by integrating complementary expertise in plastic packaging;
- and consolidate its position as a key provider of responsible and innovative packaging solutions.

This acquisition is the result of a long-standing partnership between the two companies and will enable the newly combined SC Pack Group to achieve a turnover of nearly €350 million and bring together around 500 experienced packaging professionals in more than 15 European countries

Marco Bos, CEO of Frapak Packaging, is reinvesting significantly alongside the Allemandou family and MML, becoming one of the group's main investors. He also becomes a Founding Managing Partner and joins the Executive Committee of SC Pack, further strengthening his involvement in the group's strategy and leadership.

The strategic and operational positions of Frapak Packaging and SC Pack will be maintained, as will its current leadership team and managers, ensuring continuity of operations and close relationships with clients.

"The integration of Frapak into SC Pack is fully aligned with our European growth strategy and allows us to broaden our expertise in packaging solutions, particularly in the field of sustainable plastics," said Stéphane and Christophe Allemandou, Founders of the SC Pack Group.

For his part, Marco Bos added: *"Joining SC Pack is a tremendous opportunity for Frapak. We share common values and a vision focused on innovation and sustainability, supporting customers with our packaging experience."*

SC Pack and Frapak are delighted to combine their expertise and share their know-how. Together, the two companies will strengthen their ability to support customers with solutions that are ever more innovative, responsible, and tailored to market needs.
